Good morning Chris:

I received your phone message this morning re test pile driving at the proposed site. Since the project has changed somewhat over the last few months, Transport Canada is requesting the latest updated drawing 11" X 17" showing the proposed test pile locations. As discussed with you earlier, a pile driving plan is also required in the application and will first have to be approved by David Featherby, the Harbour Master.

Please discuss the pile driving plan with Mr. Featherby (250) 363-3578 or feathed@tc.gc.ca . Once you have a plan, submit to both Mr. Featherby and myself. Once we are satisfied the pile driving can take place safely, I will complete the required documents. If you have any questions, please call.

Community Marine Concepts Ltd.
1244 Muirfield Place, Unit 104
Victoria, B. C.
V9B 6T3

Attention: Mr. Robert Evans
Vice-President

Dear Sir:

Subject: Victoria Marina Proposal

Further to prior correspondence and meetings, the department has concluded that the proposal as submitted in the document *Victoria International Marina Traffic and Communication Plan* dated March 2008 (Expanded and Revised May, 2008) and accompanying plans is sufficient for the department to authorize Community Marine Concept Ltd. to do the test pile driving and sediment sampling required. Please contact the Harbour Master, Mr. David Featherby at 250-363-3578 before starting the work.

Please note that the proposal must undergo a review pursuant to the *Navigable Waters Protection Act* and is subject to an Environmental Assessment pursuant to the *Canada Environmental Assessment Act*. Formal approval of the proposal will only be considered after completion of those processes.

Sincerely,

Robert Prud'homme
Superintendent, Property Services
